LANXESS – J.P. Morgan European Materials Conference

Earnings back on high previous year level

Matthias Zachert, CEO // Michael Pontzen, CFO
The information included in this presentation is being provided for informational purposes only and does not constitute an offer to sell, or a solicitation of an offer to purchase, securities of LANXESS AG. No public market exists for the securities of LANXESS AG in the United States.

This presentation contains certain forward-looking statements, including assumptions, opinions, expectations and views of the company or cited from third party sources. Various known and unknown risks, uncertainties and other factors could cause the actual results, financial position, development or performance of LANXESS AG to differ materially from the estimations expressed or implied herein. LANXESS AG does not guarantee that the assumptions underlying such forward-looking statements are free from errors, nor does it accept any responsibility for the future accuracy of the opinions expressed in this presentation or the actual occurrence of the forecast developments. No representation or warranty (expressed or implied) is made as to, and no reliance should be placed on, any information, estimates, targets and opinions contained herein, and no liability whatsoever is accepted as to any errors, omissions or misstatements contained herein, and accordingly, no representative of LANXESS AG or any of its affiliated companies or any of such person's officers, directors or employees accepts any liability whatsoever arising directly or indirectly from the use of this document.
Agenda

1. Executive summary Q1 2021
2. Financial and business details Q1 2021
3. Back-up
Q1 2021: Execution on strategy, solid earnings level

**Q1 Highlights**

**Strategic:**
- Acquisition of Emerald Kalama Chemical signed
- Two bolt-on acquisitions closed in Consumer Protection segment
- Entry into battery chemistry business announced: electrolyte production for Tinci at BU SGO

**Financial:**
- Volumes above previous year after unexpectedly strong March
- EBITDA pre on previous year level at €242 m, stable margin at 14.3%
- Several effects burden Q1’21: winter shutdowns (USA), energy & freight costs, raw material price increases, FX
ESG theme as a chance - LANXESS goes climate neutral by 2040

Our goal: Climate neutrality

- Reduction of N₂O emissions and change to renewable energies
- CO₂e balance as criteria for organic growth and acquisitions
- Focus R&D activities on climate neutral processes and technologies

Our goal: Climate neutrality

Three-pronged approach

- Reduction of N₂O emissions and change to renewable energies
- CO₂e balance as criteria for organic growth and acquisitions
- Focus R&D activities on climate neutral processes and technologies

Ahead of EU regulation

LANXESS is on track to achieve targets set for 2025

1 Climate neutral: Less than 300,000 tons of CO₂ equivalents per year. These will be reduced through compensation measures.
2 This is based on current legislation. There is a plan for a more ambitious 2045 Net-Zero Emission Goal to be approved by cabinet shortly.
LANXESS enhances its disclosures according to SASB and TCFD reporting standards

Mapping of KPIs to SASB\(^1\) standard

- SASB with **uniform reporting procedures** for sustainability KPIs to facilitate categorization and analysis
- **Growing importance globally** after initial focus in US
- LANXESS publishes a SASB Index in accordance with Chemical Standard for environmental, social and governance issues

Reporting according to TCFD\(^2\) standard

- TCFD with recommendations for more effective **climate-related disclosures**, in particular to report information on climate-related opportunities and risks
- Disclosure around four thematic areas: Governance, strategy, risk management and metrics and targets
- LANXESS acknowledges the need for improved and increased reporting of **climate-related financial information**

LANXESS takes a proactive role in contributing to a better, sustainable future

---

\(^1\) SASB = Sustainability Accounting Standards Board
\(^2\) TCFD = Task Force on Climate-related Financial Disclosures
Current outlook: Recovering demand in most end markets, increasing raw material prices and FX burden

Advanced Intermediates
- Increasing demand in all end markets, but energy prices burden
- Boom in construction in all regions, strong order book

Specialty Additives
- Strong demand for automotive supports all BUs; aviation still weak
- Positive trends in key industries: Construction strong, oil & gas improving

Consumer Protection
- Disinfection, purification and biocides with good business momentum despite high comparable base
- Agro market rebounding

Engineering Materials
- Strong auto recovery in all regions, Force Majeure of supplier burdens
LANXESS guidance raised – recovery gains traction

Current view on economy
- Ongoing recovery in most end markets:
  - Strong rebound in automotive, agro and construction
  - Aviation still weak, oil & gas gradually improving
- Further soaring raw material prices trigger typical time lag for pass-through

LANXESS outlook
- Q2: EBITDA pre range of €240-280 m expected, despite burden of
  - Unplanned shutdowns at BU HPM (~€5-10 m)
  - Weak US Dollar
- FY 2021 EBITDA pre expected €950-1,000 m
Agenda

1. Executive summary Q1 2021
2. Financial and business details Q1 2021
3. Back-up
LANXESS Group: Results back on solid previous year level

Strong volume growth, but FX burdens

- Stable sales driven by volumes but impacted by adverse FX effect and lower price level compared to previous year
- Raw material prices still slightly below previous year but massive sequential upswing in Q1 2021
- EBITDA pre and margin on previous year level. Positive volume growth offset by time-lag in raw material price pass-through and negative FX

**Q1 Sales vs. PY**

*All figures excluding BU LEA, which is reported as discontinued operation
Advanced Intermediates: Strong volume growth

Rising volumes, prices lag behind

- Sales increase driven by significantly higher volumes in both BUs mitigated by lower prices and negative FX effect
- Stable price level at BU IPG. BU AII with lower prices, significant increase in raw material prices not yet passed-through
- EBITDA pre and margin impacted by price pass-through delay, higher energy costs and negative FX

  2020 figures restated

Q1 Sales vs. PY

Price  Volume  FX  Portfolio
-4%  +8%  -3%  0%

Total  +1%
Specialty Additives: Results impacted by weather-related shutdowns and negative FX development

Shutdowns burden

- Sales decline due to lower volumes and negative FX effects, compared to still strong previous year level
- Weather-related shutdowns in the US and still weak demand from aviation led to lower volumes in BU PLA and LAB, while BU RCH benefits from auto recovery
- EBITDA pre and margin impacted by weather-related shutdowns, higher freight costs and adverse FX effect; shift of AXX dilutes margin

Q1 Sales vs. PY

* New reporting structure as of Q1 2021: Business Line “Antioxidants and Accelerators” (AXX) shift from BU AII to BU RCH (segment “Specialty Additives”); 2020 figures restated
Considerable sales increase driven by strong volumes, partly offset by negative pricing and FX
- Ongoing strong demand for disinfectants and biocides, volume uptick inflated by IFRS 15
- Improved EBITDA pre due to higher volumes despite weather-related shutdown in US (BU MPP); lower prices and FX weigh on result
- Acquisitions in BU MPP contribute nicely

</tbody>
</table>

Q1 Sales vs. PY
Rise in sales due to strong demand from auto industry, partly offset by negative FX

Prices recovered to previous year level after massive decline during 2020

EBITDA pre and margin increase driven by improved volumes, offsetting higher energy and freight costs as well as FX
P&L Q1: Profitability on previous year level, unexpectedly strong March

- Increase in selling expenses reflects higher freight costs, partly mitigated by lower travel expenses
- Stable earnings, margins and EPS due to recovering demand despite weather-related shutdowns, higher energy prices and negative FX development

Maturity profile actively managed and well balanced

Long-term financing secured

- Diversified financing sources
  - Bonds & private placements
  - Undrawn sustainable revolving credit facility
- Average interest rate of financial liabilities ~2%
- Next bond maturity in October
- All group financing executed without financial covenants

Liquidity and maturity profile as per March 2021

* Hybrid bond with contractual maturity date in 2076 has a first optional call date in 2023.
On the growth track: Three highly complementary acquisitions strengthen LANXESS specialty character

Leading Consumer Protection player and strategic expansion into growth markets Food & Animal Nutrition
Second largest acquisition: 100% complementary fit, attractive synergy potential and straightforward integration

Building a leading microbial solution player
Highly complementary in product portfolio and regional set-up

Niche Play: Specialty fungicides for the packaging industry
Further sustainable growth based on trend for replacement of plastic with antimicrobial paper packaging
EU market for battery chemicals to grow to over EUR 10 billion by 2025

Massive growth in demand for battery cells in the EU

Chemistry accounts for 2/3 of battery cell costs

Sources: Avicenne Energy, 2019; own calculations
LANXESS offers key products for Li-Ion batteries

Battery housing
- PA/PBT compounds for components of the e-powertrain (BU HPM)

Electrolyte
- Key materials (Hydrofluoric acid, phosphorus chemicals) for electrolyte salt (LiPF₆) (BU AII/BU PLA)
- Flame retardants (BU PLA)

Cathode & Anode
- Iron oxide as precursor for cathode active materials (BU IPG)
- Ion-exchange resins for refining battery grade cobalt, nickel and lithium (BU LPT)
- Lithium chemicals from tail-brine (BU PLA)*

PA = Polyamid / PBT = Polybutylenetriphenalat PLA = Polymer Additives, AII = Advanced Industrial Intermediates, IPG = Inorganic Pigments, HPM = High Performance Materials, LPT = Liquid Purification Technologies
* In case of successful feasibility
LANXESS starts electrolyte production for Li-Ion batteries in cooperation with market leader TINCI

**Partnership with TINCI**

- TINCI (Chinese Guangzhou Tinci Materials): a leading manufacturer for battery materials and the largest electrolyte producer worldwide

- Saltigo starts electrolyte production for TINCI in its high-tech plant in Leverkusen (Germany) early 2022

**TINCI with leading position in fragmented electrolyte market***

- TINCI
- Zhangjiagang Guotai-Huarong
- Capchem
- Jinniu
- Mitsubishi
- Others

**Raw materials***

- LiPF₆

**Local raw material supply is key for cell manufacturers and OEMs**
On track to climate neutrality in 2040: Nitrous oxide reduction in Antwerp

Milestone in our climate strategy

- Nitrous oxide is generated during caprolactam production
- Investment of approx. EUR 10 million

Plant significantly reduces emissions:
150 kt CO$_2$e / year less

Second plant planned for 2023
Impact: 300 kt CO$_2$e / year less
Strong portfolio of attractive businesses
