Our journey: Shaping New LANXESS – a story in three chapters

Recap Chapter 1: Rebuilding a competitive platform

Some value accretive portfolio modifications already addressed

Chemtura sales and EBITDA adjusted are based on FY 2016; USD / EUR 1.10

Restructuring and change of strategy yields first positive results

But it takes more time to change a company fundamentally

Chapter 1 Repair

Chapter 2

Chapter 3

- Industry balance and market set-up need further improvement
- Leadership positions in many business units achieved but substantial catch-up still to be done
- Margin and profitability level has visibly improved but still lagging behind industry standards

Chemtura integration: €100 m of synergies by 2020

- €50-100 m Investments in Specialty Additives

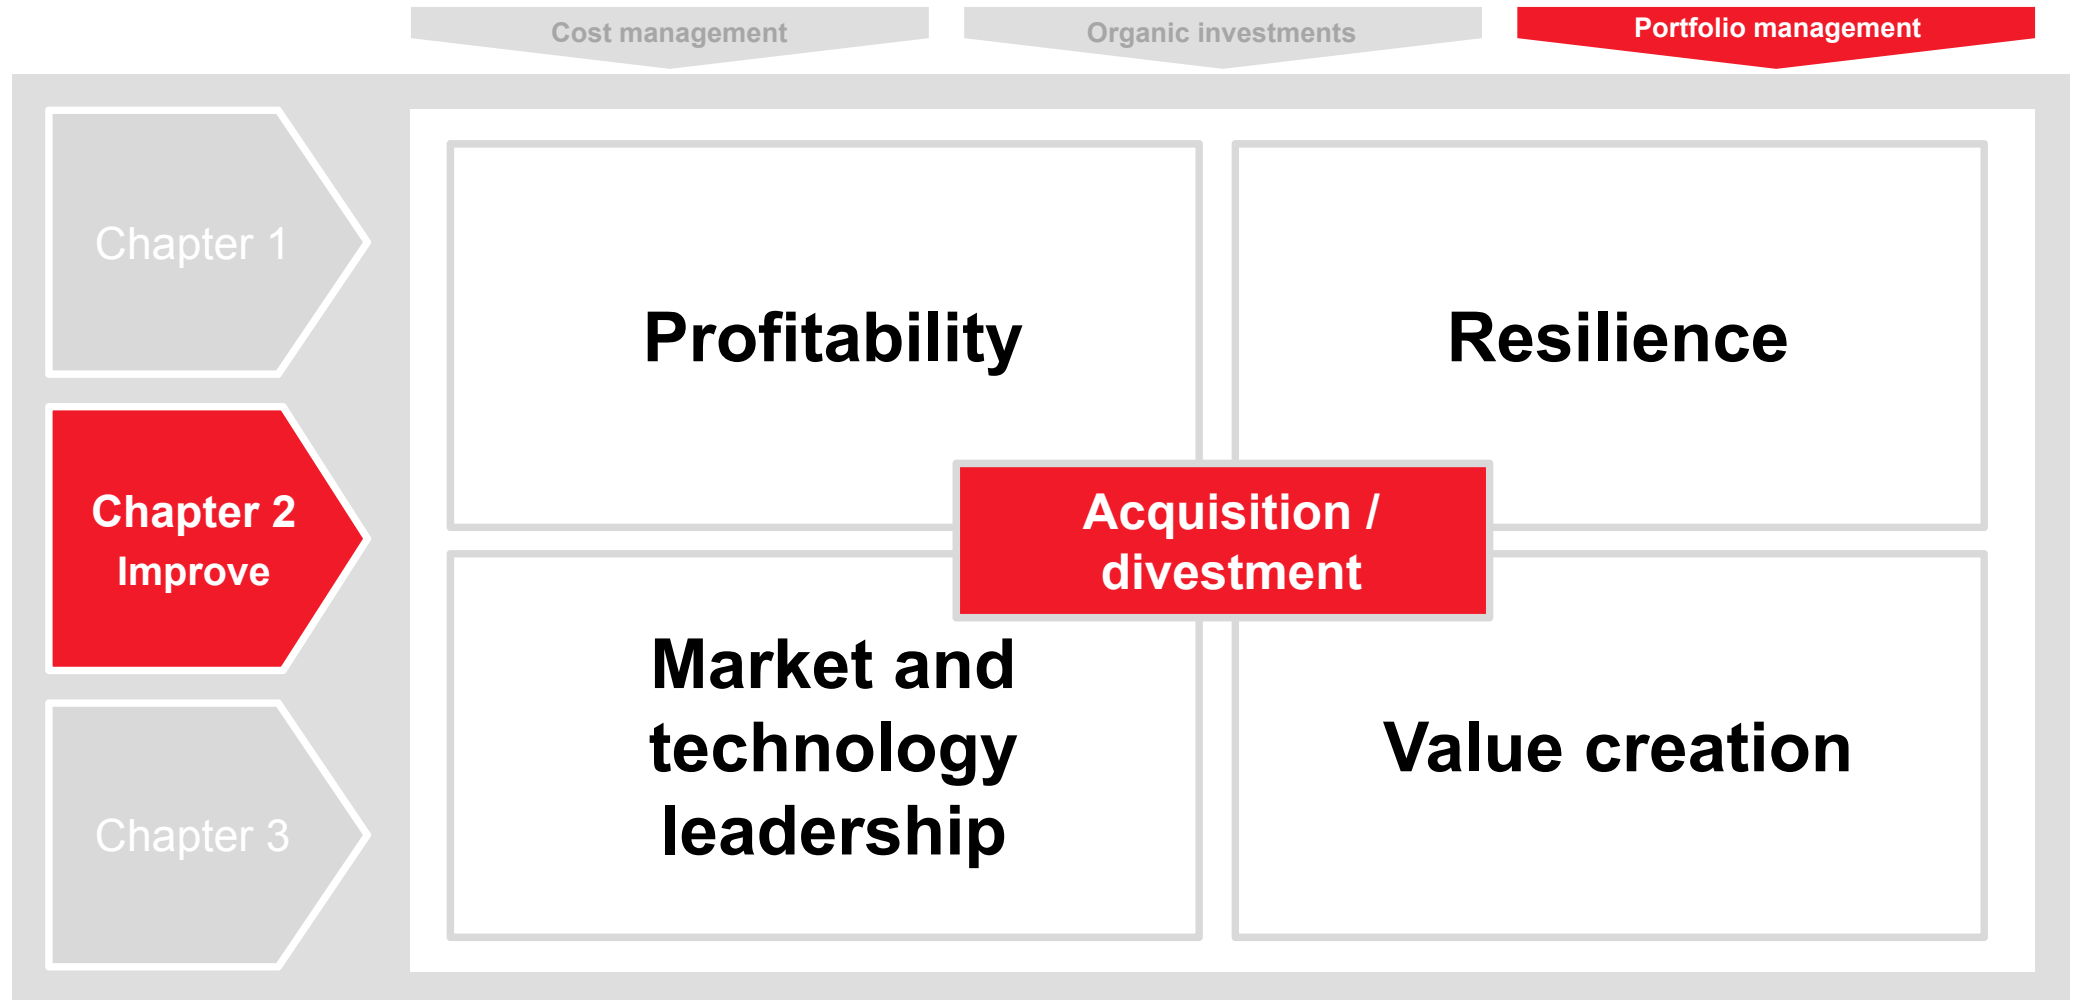

**~€400 m capex until 2020 at
ROCE of ~20%**

% ROCE

Target: Increase ROCE to former levels

Portfolio optimizing with clear criteria

Chapter 3: More balanced and stronger platform along three key dimensions

Chapter 1

Chapter 2

**Chapter 3
Accelerate**

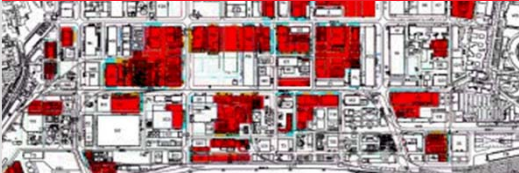

Regional platform

Industrial platform

Market positions

Balancing the ground for further growth

- Regionally balanced platform with no pronounced dependencies
- Diversified industrial platform mitigates impact from any individual industry's volatility
- Market positions in every business at least among leading players to keep or improve profitability level

Solid growth

Chapter 3 will establish an even stronger platform

Vulnerability to single trends will be minimized

Chapter 1

Chapter 2

Chapter 3
Accelerate

Peak to trough EBITDA margin volatility not to exceed 2-3%pts

Illustrative: Margin volatility

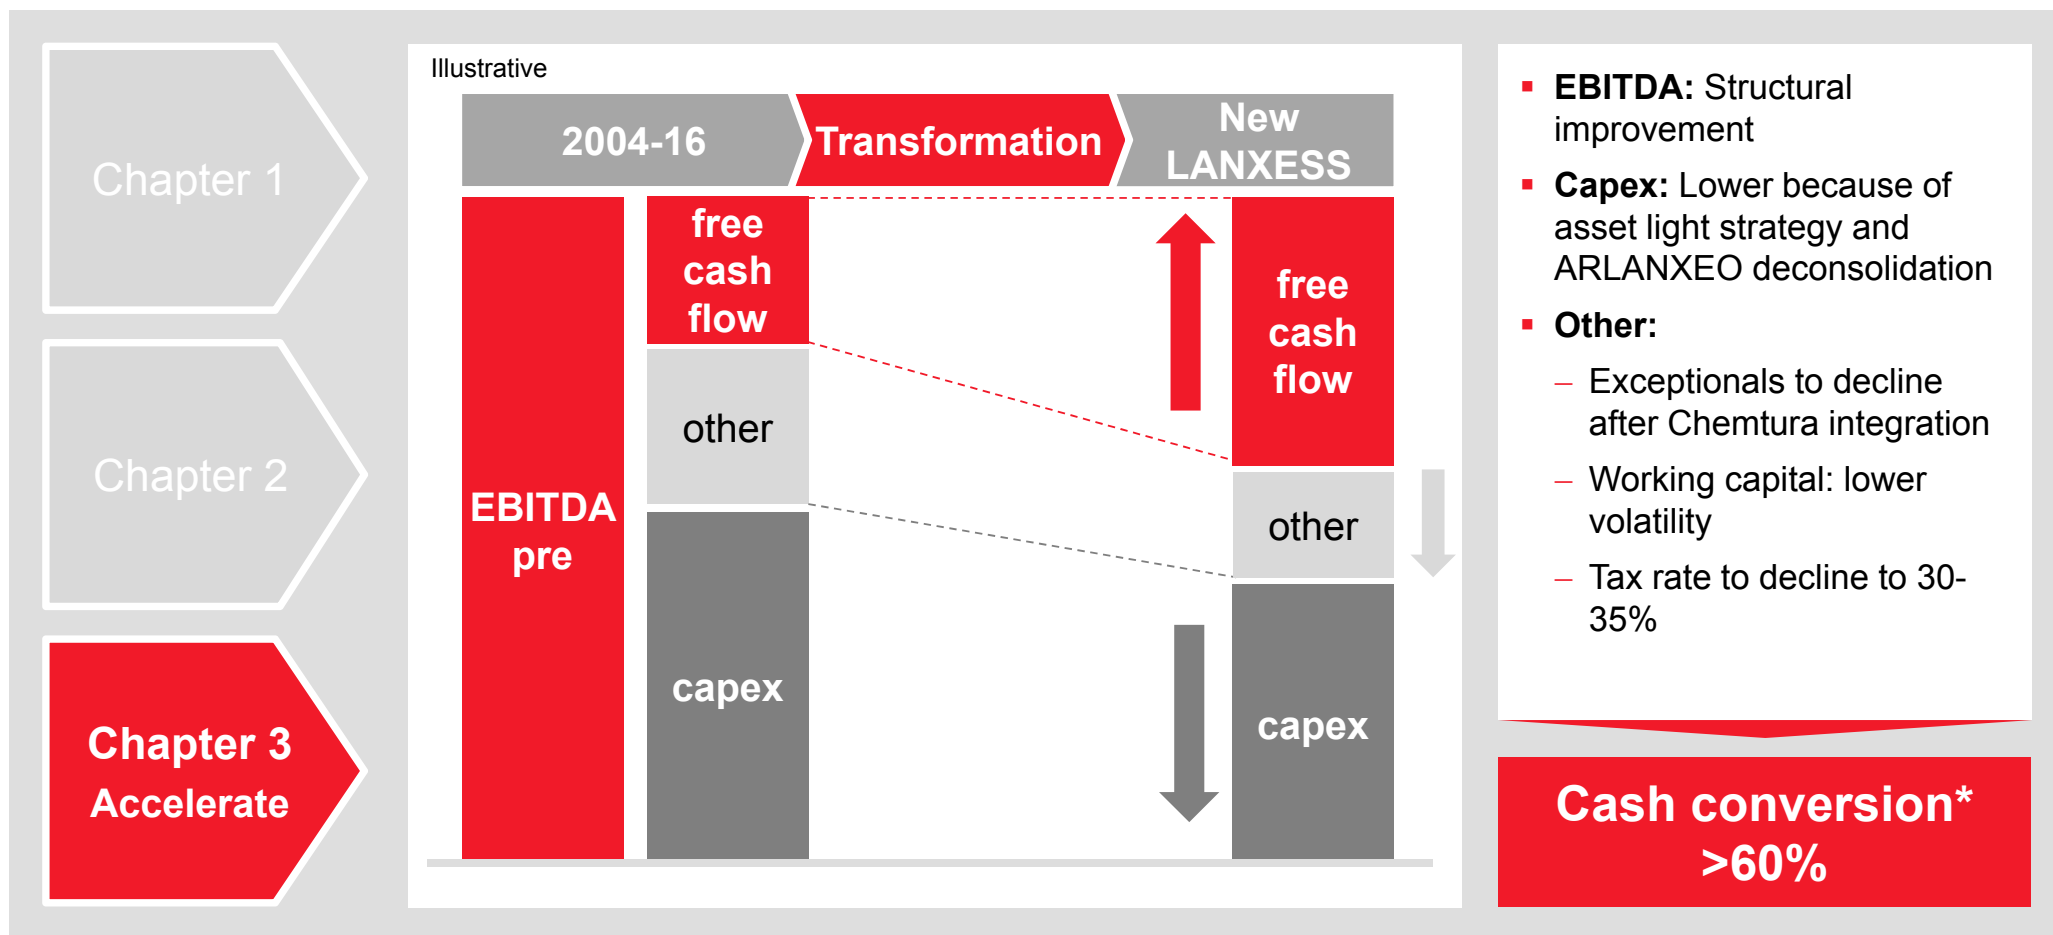

- Former dependency on few cyclical businesses
- Lack of cushioning interference of cyclical swings

- Improved balance of portfolio, regions and industries
- Cyclicalities scaled back

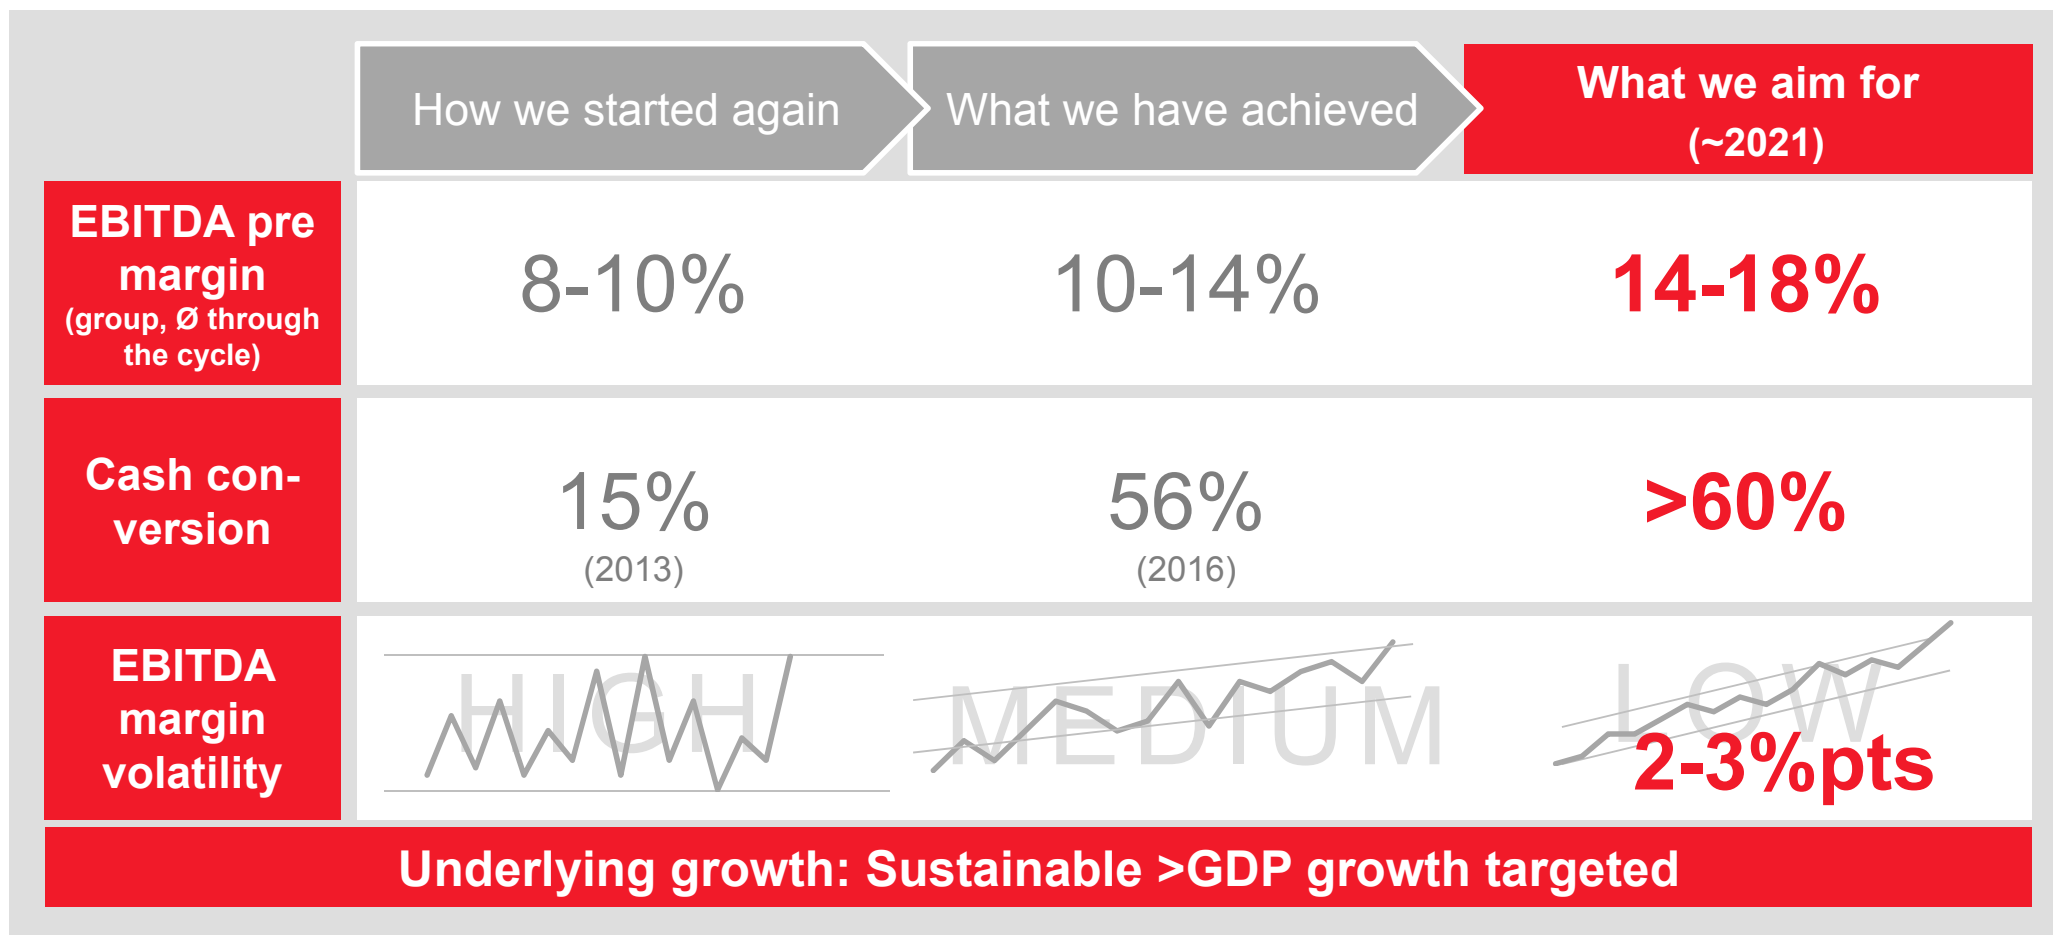

Use of entire toolbox to improve resilience

LANXESS free cash flow and cash conversion rate to improve

* Calculated as (EBITDA pre – capex) / EBITDA pre

Chapter 3: Ambitious financial goals – substantially higher margins with significantly lower volatility

Cash conversion: (EBITDA pre – capex) / EBITDA pre

The destination of our journey: A company with convincing characteristics

Business platform

- Nicely balanced: Regionally and industrially, thus less cyclical
- Leading market and technology positions

Financial profile

- Resilient cash conversion
- Investment grade rating

Cultural profile

- Enthusiasm for what we do
- Performance team culture as basis for the next steps after 2021

Q2 sales bridge yoy [€ m]

Q2 yoy effects

- Substantial price effect by raw material cost pass-through
- Continued good underlying demand in both BUs after exceptionally strong Q1. Some lower volumes in BU TSR due to planned turnaround
- EBITDA burdened by low double digit €- million inventory write off (mainly butadiene)
- Successful raw material cost pass-through offset mainly by higher energy costs

FY 2017 on track – EBITDA guidance confirmed

Macro economics

- Persisting macroeconomic, geopolitical risks
- Agro chemicals demand modestly weaker than expected; while all other industries remain stable
- Asia Pacific continues to be the most attractively growing region

FY 2017

- Business dynamics solid, while growth expectations for H2 are softer due to the high comparable base in H2 2016
- **FY EBITDA pre between €1,225 m – €1,300 m**

FY 2017 EBITDA pre guidance includes contribution from the Chemtura acquisition as of April 21, 2017.

Inventory effects from PPA are treated as exceptional items

At USD/EUR 1.10

High volatility in raw material prices

Global raw materials index

- Sharp decline in raw material prices in Q4 2014/ Q1 2015 driven by a steep drop in the price of oil
- 2015: Volatile raw material prices trended downwards through year end
- 2016 with an upward trend that accelerated during Q4
- 2017 started with a spike in raw material prices which we expect to largely reverse in H2 2017

LANXESS excluding Chemtura businesses, average 2013 = 100%,
