LANXESS

2016: EBITDA pre seen at €880-930 m based on year-to-date performance – H2 expected to be softer

Advanced Intermediates

- Due to strong end market diversification the business segment is expected to perform somewhat above prior year level
- Volumes in agro chemicals expected to be at previous year's level, despite softening agro end industry

Performance Chemicals

- Broad and strong market positions enable the segment to at least balance macro economic challenges
- The two flagship businesses (BUs IPG and ADD) should benefit from new capacity and newly established business platform
- Niche businesses MPP and LPT with positive volume momentum

BU HPM

- Engineering plastics should show positive development in 2016, driven by various applications (e.g., automotive, E&E)

ARLANXEO

- Macroeconomic weakness in emerging markets expected
- New rubber capacities might lead to further margin pressure

FY 2016 EBITDA pre now specified at €880-930 m
Q1 2016 expected at €240-260 m

At USD/EUR of 1.10, reconciliation is expected to show ~€50 m less in hedging expenses in 2016 vs. 2015.
