The future of sustainable chemistry Green chloroformates by Saltigo

Our new ECO-branded chloroformates, Methylchloroformate ECO & Ethylchloroformate ECO, combine full performance with significantly reduced environmental impact. Thanks to the use of green chlorine, renewable energy, and optimized processes, we achieve up to 40% lower CO₂ emissions — without compromising on quality.

Choose Saltigo's ECO alternative to strengthen your sustainability profile and actively reduce your Scope 3 emissions.

Further reduction

„Future-proof & environmentally friendly“ – with bio-based raw materials e.g. biobased methanol or ethanol and green steam further reduction of PCF value possible

Be a frontrunner of sustainability and buy now the ECO alternative!

Tailor-made sustainability

Sustainability is part of our DNA

With a strong focus on net-zero custom manufacturing, we offer our customers:

- PCF-reduced products, up to net-zero emissions upon request
- Certified carbon footprint calculation, using the LANXESS product carbon footprint engine aligned with TfS standards
- Innovative technologies and green raw material sourcing to continuously lower Scope 1, 2, and 3 emissions

Our commitment to sustainability is recognized by a number of sustainability indices and rankings.
