

# QUALITY PROTECTS.

Your partner for  
**Personal Care Ingredients**

QUALITY WORKS.

**LANXESS**  
Energizing Chemistry

## LANXESS AT A GLANCE

LANXESS is a leading specialty chemicals company based in Cologne, Germany, that is well-established on the global market. The core business is the development, manufacturing and marketing of chemical intermediates, additives and consumer protection products for a broad range of applications and markets.

We understand the growing importance of **providing safe and sustainable solutions to protect consumers and their environment**. The challenges that our customers face drive us to supply them with innovative, high-quality ingredients, as well as to provide them with extensive technical and regulatory advice. We are committed to sustainability and aim to achieve climate neutrality by 2040 (scope 1 and 2) and a net zero value chain by 2050 (scope 3).

# YOUR PARTNER FOR PRESERVATION SOLUTIONS

## A diverse portfolio of safe and effective ingredients

- Broad range of preservation solutions and other cosmetic ingredients to meet your specific formulation requirements
- Portfolio ranging from traditional technologies to innovative, sustainable offerings
- Naturally derived and nature-identical preservation solutions to suit consumer products with clean and green labels

Our main focus is on **safe and effective preservation solutions** to protect Personal Care formulations against the hazards of microbial contamination. They can be applied in leave-on and rinse-off applications – LANXESS preservatives can be found in many recognized cosmetic brand products such as face creams, body lotions, shampoos, conditioners and deodorants against unwanted bacteria, yeasts and molds.

## Reliable partnership beyond the product

We assist you in creating formulations that stay ahead of consumer trends and shifting regulations. This includes optimizing individual formulations for robustness or labelling as specified by varying local requirements.

Benefit from

- The broad technical, microbiology and regulatory know-how of our LANXESS experts
- Our global network of excellently equipped R&D facilities

With production sites across all continents, LANXESS owns an efficient supply network to serve you globally.

# OUR KEY PRODUCTS FOR PERSONAL CARE FORMULATIONS

Our comprehensive portfolio of preservative solutions for Personal Care not only adds value to your formulations but also safeguards consumer health and safety while enhancing brand recognition. With our commitment to developing innovative and sustainable solutions, we provide the foundation for any preservation strategy, ensuring the protection of both consumers and your brand.

## Neolone® PH 100 Preservative

### Phenoxyethanol

Neolone® PH 100 Preservative is a broad-spectrum antimicrobial useful for the protection of cosmetic and personal care products, including shampoos, hair conditioners, creams, and baby-care products. Neolone® PH 100 Preservative offers excellent stability over a wide pH and temperature range, providing an effective control of a broad spectrum of bacteria. CIR and SCCS rate phenoxyethanol as a safe preservative that can be used at a maximum of 1% in all Personal Care products.

## Neolone® BioG Preservative

### Ethyl Lauroyl Arginate HCl

Neolone® BioG Preservative is based on Ethyl Lauroyl Arginate HCl which is derived from natural ingredients. It provides excellent broad spectrum activity against a wide range of gram-negative and gram-positive bacteria, yeasts and molds. Most stable between pH 3 and 6, it demonstrates optimum performance in Personal Care products with a low anionic content. Neolone® BioG Preservative is non-irritating, non-sensitizing at recommended use levels, and is COSMOS and NATRUE raw material certified.

## Kathon® CG Preservative

### CMIT/MIT

Kathon® CG Preservative delivers superior, broad-spectrum protection for rinse-off hair and skin care items. It effectively combats bacteria, yeasts, and molds within the standard pH range of cosmetic products. It provides an excellent environmental profile, breaking down quickly, and without bio-accumulation or environmental persistence. Personal Care products remain free from any color or odor transfer. Its effectiveness at low use levels makes it a cost-attractive solution.

## Oxone™

### Potassium Monopersulfate

Oxone™ Monopersulfate Compound is a powerful non-chlorine oxidizing agent used as a cleaning and bleaching component in oral care products such as denture cleansers. Oxone™ Monopersulfate Compound, a trusted oral care ingredient for over 60 years, effectively removes the stubborn stains caused by food, beverages and tobacco. It is a stable powder product that is easy to formulate, odor-free, works faster than many other oxidizers.

## Regional Product Availability

The products are not available in every region of the world. Please reach out to your LANXESS representative for country specific information on the registration status per product. We are happy to assist you in finding the right product for your formulation and region.

## Let us find your individual preservation solution

For information on the appropriate dosage, possible combinations and formulation specifics of this preservative for your individual application, please contact your LANXESS representative to closely support you.
