Chart-No. 25

LANXESS manages its currency exposure

Economic environment – foreign currencies

- The current weakness of the U.S. Dollar is considered in our FY 2007 guidance
- Generally, a weak U.S. Dollar burdens our results
- Sensitivity: Based on our annual net exposure, a change of 1 cent of the exchange rate of the U.S. Dollar to the Euro affects our EBITDA by €5-6 m
- However, the actual impact may be significantly lower due to our rolling hedging approach

Chart-No. 26

LANXESS has significantly reduced its volatility

Peak to trough fluctuation is significantly reduced since spin-off

- Most volatile businesses divested (~€1.4 bn of sales)
- Sales and purchasing contracts renegotiated
- Restructuring has led to a leaner and more efficient organization
- Cost structures have been changed to a higher portion of variable costs

There is no reason why LANXESS' margins* should be more volatile compared to its peers

The market expects chemical companies' margins* to fluctuate by 3%-4% peak to trough

* EBITDA pre exceptionals

Chart-No. 27

Dividend policy specified with substantial increase targeted already for 2007

- Successful transformation of the company

Chart-No. 28

LANXESS is well on track to achieve its FY targets

Guidance update for 2007

- FY 2007 EBITDA*guidance reiterated:

- Underlying P&L tax rate seen around 30%, excluding effects from LUP JV. Reported tax rate will however be distorted due to LUP-divestment
- D&A around €300 - €310 m (increase vs. 2006, mainly due to impairments in LUP of ~€50 m)
- Reminder: majority of restructuring exceptionals expected to have occurred in Q4 2007
