Climate Action and Energy Efficiency
For LEANExE, climate action based on estimated energy use is the right tools for society and also a key to delivering financial performance in the long term.

Energetic Employees and Performing Teams
We create a motivating, energetic and health-promoting working environment for all employees, striving for high engagement and impact.

Energy efficiency
In 2023, our target was to reduce energy consumption by 1.34 TWh compared to the base year. This applies both to continuing operations and including the LEADING business unit.

Sustainable Products
Our products and services are marketed so that they do not pose a risk to human or the environment. We systematically evaluate the sustainability of our entire portfolio.

Sustainability criteria are also applied in the development of products and applications.

Active portfolio management from a sustainability perspective
- Development of a strategy plan for all and products and services
- Inspection and, if necessary, optimization of the quality of all registration datasets that were prepared in accordance with the REACH Regulation under the guidance of LEANExE

Business-Driven Innovation
Innovation is a critical success factor. It drives the development and business modernization initiatives for today and the future, and is a powerful tool for achieving sustainable growth.

Customer Relationship Management
In order to understand our customers better, we are continuously developing and optimizing our products, processes and services to meet the needs and expectations of our customers.

Customer Loyalty Index Score
The survey in 2020 reported a customer Loyalty Index score of 77%. The survey is carried out every two years.
